CHAMPION STEER at the New Holland Fair is this Angus shown by 13-year-old Marilyn Smucker. It was Miss Smucker's first steer project. L. F. Photo

Miss Smucker Wins At NH Steer Show In First Try

A nicely-balanced Angus with thickness over the rump won the grand championship Thursday afternoon, at the annual New Holland Fair 4-H Baby Beef Club Show "Fabion", the 935 pound entry of Marilyn Smucker, 13-year-old daughter of Mr and Mrs Edward F Smucker, Ephrata R2, later sold to Charles Myers and H D. Matz for 60 cents a pound or $561 in the club sale held at the New Holland Sales Stables It was Miss Smucker's first steer project

Reserve grand champion was a Hereford named "Butch" shown by Jacob Musser Jr., 16-year-old son of Mr and Mrs Jacob H Musser, East Earl R1

This 975 pound steer sold for 49 cents a pound or $447.75 to Norman Kolb

The 32 steers sold at auction for $10 015 95, at a total weight of 27,955 pounds The average price, with champions was $35 83 a hundredweight, and the average weight was 874 pounds Average price last year was $41 65, including champions, and average weight was 942 pounds

Charles Myers and H D Matz each bought four and one-half steers, Weaver's Poultry, three, and G S Sensenig, two

Other patrons supporting the 4-H show and sale were Horning Dodge, Hurst Tire Service, Leola National Bank, New Holland Supply, Farmers National Bank and Trust Co, New Holland, New Holland Meat Market, Good's Feed Mill, Carlos Leffler, Elam Burkholder, D M Buckwalter, First National Bank of Intercourse DeVault Packing Co, C. B Hoober, New Holland Sales Stables, Vintage Sales Stables, and Whitford Sales .

Results by class:

Top Agribusinessman Picked As Keynoter For NEPPCO Exposition

Dr Robert R Spitzer, frequently mentioned as a possible choice for Secretary of Agriculture should presidential candidate Richard M Nixon be elected, will deliver the keynote address on the opening day of the exposition of the Northeastern Poultry Producers Council (NEPPCO)

Dr. Spitzer, president of Murphy Products Co, Burlington Wis, is a member of Nixon's farm policy advisory team, and is reputed to have exerted a strong hand in preparing the G O P farm plank

He will address the opening session of the NEPPCO Exposition here in the Farm Show Building on Oct 8 on the topic, "Individual Action the Key to Survival " He's a hard-hitting speaker, well equipped to provide steam and direction to the exposition

NEPPCO president Albert J Russo will kick-off the opening day educational session at 1 30 p m in the Mid-Atlantic Room He'll be followed by an audio-visual review of poultry housing trends of the Northeast by Harry C Whelden, Jr, and William A. Aho, extension poultrymen of Maine and Connecticut, respectively.

The exposition's second day,

Seldomridge Is Chairman Of ASC Committee

Fred G. Seldomridge, Gap R1, was elected to his seventh consecutive term as chairman of the Lancaster County Agricultural Stabilization and Conservation Committee last week

John J Herr, Mount Joy, was re-elected vice-chairman, and Elmer L. Huber, Pequea R1, regular member.

Prior to the reorganization at the meeting in the Farm and Home Center, Seldomridge was re-elected to a three-year term Named to one-year terms were Jacob C Stehman, Lancaster R6, as first alternate, and Forney L Longenecker, Lititz R3, second alternate.

The offices are effective for the year beginning on Oct. 1.

Advance Notice

The Lancaster County Livestock Tour will be held Tuesday and Wednesday, October 22 and 23, into Dutchess County, New York. (near Poughkeepsie).

This over-night tour will visit beef and swine feeding and breeding operations.

Bus reservations will be needed in advance. M. M. Smith, County Agent, said details will be available early next week from the County Agent's office.

Smoker Wins Area Tractor Driving Event

The Lancaster-York County area FFA Tractor Driving Contest was held Saturday morning, Sept 28 in conjunction with the Ephrata Community Fair at Ephrata Nine boys from various FFA Chapters from the two counties participated

It was an elimination contest to determine the area representative to go to the state contest at Penn State next June during FFA Activities week The local contest was conducted according to the state rules Each boy was scored on the following.

1. Tractor Maintenance records
2. Examination of safety tractor operation and maintenance.
3. Trouble shooting a tractor not in proper condition through visual observation.
4. Maintenance demonstration Servicing and testing a battery
5. Driving skill

Each of the 5 parts counted equal points with a possible total score of 500

(Continued on Page 8)

Poultrymen To Tour York And Adams Counties

The Lancaster County Poultry Association will go on their annual tour, Tuesday, October 15 Buses will leave the Farm and Home Center at 8 00 a m and arrive home at 5 15 p.m

The tour will go to York and Adams Counties with the agenda as follows

1 A tour of the Utz Potato Chip Company in Hanover

2 A tour of the Battlefield and lunch stop at Gettysburg

3 A tour of Musselman's at Biglerville where apple processing will be in full swing

4 Finally, a visit to the L M Sweitzer Farm at Dover to see a flat deck eight birds to a cage, layer operation

The bus fare will be $2 00 per person which includes the beverage and ice cream at the lunch stop The committee requests you bring a box lunch

Reservations should be made with the Association secretary, Mrs Ethel McGarvey, 379 West Roseville Rd, Lancaster 17601 by October 11

Ruoss Wins Third Championship At New Holland Swine Show

A member of the New Holland 4-H Pig Feeding Club won grand champion honors for the third consecutive year at the New Holland Fair Swine Show held Thursday afternoon. Franklin Ruoss, son of Mr. and Mrs William Ruoss, Ephrata R2, won with his first place Duroc

Reserve grand champion was a crossbred shown by Eric Zeiset, son of Mr and Mrs Abram Zeiset, East Earl R1

Ruoss also won the fitting title and Lester Bowman, son of Mr. and Mrs Raymond Bowman, East Earl R1, won the showmanship contest.

The placings are

Type: 1, Franklin Ruoss, 2, Eric Zeiset; 3, Mary Lou Fish-

Weekly Poultry Report

Eastern Pennsylvania And New Jersey

Prices continue to advance on light type hens. In instances unfilled bids as high as 9¼c reported. Demand good for limited offerings of light type as producers continue to hold for further egg production in absence of replacement pullets to fill needs. Offerings of heavy type limited for a fair call. Prices paid at farm: Light Type hens 7½-9c, Heavy Type Hens TFEWR. **TURKEYS:** Movement generally limited to contractual agreements

Eastern Shore Exchange

Broiler and live fryer prices averaged 12.33 cents per pound this week. Prices paid ranged from a high of 13.1 cents a pound on Monday to a low of 11.5 cents a pound also on Monday. Total sales for the period were 982,500 head up 295,100 head from last week's three day period.

When Anna, duchess of Bedford, felt an energy let-down late in the day, she served hot tea and cakes. Her guests, liking the idea, imitated this hospitality. Soon the English custom of 5 o'clock tea was established.

From Where We Stand . . .

High-Classed Responsibility

A recent report with respect to the goals of one of the many poverty programs said, "This is almost the only opportunity for many to get a foothold in something better than farm work or day labor".

Well, now! You don't say?

Just what's wrong with day labor or farm work? We know, that being a white collar "flunkey" supposedly carries more prestige in the mind of many Washington Bureaucrats. And we even hear neatly dressed men who, in answer to a query about occupation say in a soft and almost apologetic voice, "I'm just a farmer."

Now we know the cost-price squeeze is a very real factor in Lancaster County farming enterprises. And we know there isn't enough land and capital to let every young man wishing to be an actual farmer be a farmer.

But that doesn't make farming a lower classed occupation. We're convinced that farming is one of the most forward-looking, honest and business-like professions in today's world. And anyone who thinks he is 'just a farmer' had better take a look at his elevated place in today's society.

The farmer is producing more corn and potatoes, more hay and wheat, more meat and milk per acre than we have ever produced before. This is one of the reasons that America is the best fed and best-clothed nation in the world. And this is the reason that the American consumer spends a smaller portion of his pay check for food than ever before. This point is underscored by the fact that whereas families in the United States spent 22.6 percent of their income for food in 1955, by now the figure has dropped sharply to an estimated 18.5 percent. And all this, because dedicated farmers accept the high-classed responsibility of feeding the nation and the world.

At least that's the way it looks from where we stand.

Autumn

Autumn is here The cooler nights and the football games on TV prove that. To some autumn means a journey to the mountains to view the red, gold and yellow colors that no artist can quite catch in all their glory, or a looking forward to the hunting season. For farmers it means picking corn and the finishing of harvesting and planting.

Each season has it's attractions, and autumn has it's full share. So whether you are a football fan, an artist, a hunter or a farmer who enjoys the smell of the cool fall air, there is something in autumn for you.

Nobody's Business . .

According to the Constitution, a census is supposed to be taken every 10 years. The original idea was to find out how many people lived in the United States. There was no intention to probe into their private affairs. Now the Census Bureau is going far beyond this and wants the answers to such questions as: whether you have a home freezer, if you have been married before, how many people use your bathroom or kitchen and many other things that are really nobody's business.

The next census is due in 1970. Legislation that deserves unanimous support has been introduced to prohibit the federal government from using this occasion as a means of invading the privacy of American citizens. After all, the purpose of the census is to count people — not the number of gold fillings in their teeth.

At least that's the way it looks from where we stand.

Monetary Policeman

One of the strongest arguments put forth in support of the 10 per cent surtax recently passed by Congress was the need to put our financial house in order so that foreign nations would regain confidence in the dollar and thus slow the rush to convert foreign-held dollars to gold. There is a puzzling contradiction in all this. For years we have been told that gold is an anachronism that should be done away with in today's monetary picture. U.S. citizens, in fact, were separated from their gold coins many years ago, and the gold backing of money has gradually disappeared.

The educational process of convincing everyone that gold as a medium of exchange is as dead as the Latin language is very nearly complete. That is why it is disconcerting at this late date to find that gold is playing an impressive part in forcing fiscal responsibility on our own government which, so far as the ordinary person is concerned, has been off the gold standard all these years. Apparently, gold is still a monetary policeman which governments have failed to rid themselves of as yet.

Across The Fence Row

It had been a blistering hot day, and the lady of the house finally had her guests seated around the table for dinner, and as she seated herself at the table, she asked her four-year-old son to ask the blessing. "Oh, mom, I don't know what to say," he protested, somewhat embarrassed before all the guests. "Well, just say what you have heard me say . . . remember?" Obediently he bowed his little head and repeated, "Oh, Lord, why did I invite these people here on a hot day like this one."

Local Weather Forecast

(From the U. S. Weather Bureau at the Harrisburg State Airport)

The five-day forecast for the period Saturday through next Wednesday calls for temperatures to average below normal with daytime highs in the 60's and over-night lows in the 40's to 50's. It is expected to be generally cooler throughout the period Normal high-low for the period is 70-48.

Rain may total greater than one-half inch as showers in the mountains Saturday and general rain the beginning of next week.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons.

BY LAWRENCE W. ALTHOUSE

LISTENING?

Lesson for October 6, 1968

Background Scripture: Hebrews 1 through 3. Devotional Reading: Hebrews 2:4-10.

Some time ago I saw a skit in which there is a man who is wailing: "I've lost God! I can't find him!" But a friend takes the distraught man by the arm and says: "Don't get excited; just sit down, be calm, and try to remember where you had him last."

Rev. Althouse

This little skit is illustrative of the situation in which many people find themselves today. While a small contingent of theologians has proposed that God is dead, others have countered, saying, in effect, "No, it's just that he has been temporarily misplaced!" Whereas in other times men have seemed preoccupied with the experience of his presence, it is the sense of his absence that troubles many today. As some have put it, "Currently, God is conspicuous by his absence!"

The elusive one

Before you write this off as simply some new twist of contemporary theology, remember that this is a very ancient emotion. The Psalms are full of exasperated cries for God. At one point, the Prophet Isaiah cries out: "Truly, thou art a God who hidest thyself" (Isaiah 45:15). But nowhere is the theme more poignantly stated than in Job 23 where the tormented man cries: "Oh that I knew where I might find him, that I might come even to his seat." No matter where he has looked, God has seemed to elude him: "Behold, I go forward, but he is not there; and backward, but I cannot perceive him; on the left hand I seek him, but I cannot behold him; I turn to the right hand, but I cannot see him." Even Jesus reached out for the assurance of God's presence when on the cross he repeated the ancient words of the Psalmist: "My God, my God, why hast thou forsaken me?"

That's God, all right!

In C. E. Montagu's novel, Rough Justice, (Doubleday, Page and Company, 1926) a father has asked his son whether he believes in God. The boy replies uncertainly that sometimes he feels "Something" stirring within him, some unexplainable, yet undeniable presence. When he finishes, his father exclaims: "That's God all right!" His son had discovered that one doesn't have to search to the ends of the earth, memorize the right creed, joing the correct church, practice the right ritual, or express his experience in the right words. He didn't have to search for God at all, because God, it turned out, was the one who did the searching.

We do not find him, but from time to time we allow him to find us. It is not God who has been misplaced, but we. We are the elusive, slippery ones. We are the ones who, like the Prodigal Son, leave the Father's house, break off all communication and go into the far country.

The relentless God

Yet it is a relentless God who pursues us. When Adam hid himself in the Garden, it was God who came looking for him. When Jonah fled to escape him, God followed wherever he went. Like a shepherd, says Isaiah, he tends his flock and moves heaven and earth to bring back the lost.

As the writer of Hebrews makes clear, then, it is not God who breaks off the dialogue. "In many and various ways God spoke of old to our fathers by the prophets; but in these last days he has spoken to us by a Son . . ." (Hebrews 1:1,2 RSV) God continues to speak now as always. This is what Dag Hammarskjold meant when he wrote:

*"How can you expect to keep your powers of hearing when you never want to listen? That God should have time for you, granted as that you cannot have time for Him."**

God still speaks. Are you listening?

*Dag Hammarskjold, **Markings**, Afred A. Knopf, Inc. 1964.

NOW IS THE TIME . . .

By Max Smith

Lancaster County Agent

To Handle Sorghums Carefully

Growers of sudan grass or the sudan-sorghums hybrids are reminded of the possible danger of prussic acid poisoning in these forage crops immediately following a killing frost There is less danger in the sudan grass plant After a killing frost neither of these forage crops should be used in a fresh state of condition, the plants should be allowed to stand for a week until they are dry and then they may be used, or if they are made into silage, and allowed to ferment for a month, they will be safe to use When stunted or partly killed by frost, the new growth is dangerous and should not be used fresh.

To Seal Trench Silos

With the second good corn crop in two years many livestock producers will be using some type of horizontal or trench silo to store extra corn silage The success of this type of silo is how good a packing and sealing job is done, because of the great amount of surface exposed Within 48 hours after the filling is completed the surface should be sealed with plastic, earth, sawdust, or some other type of material. Many growers are using plastic, but the problem is to keep the plastic down tight on the surface and not permit air to enter; this may take some adjustment during the first week in order to keep the surface airtight

To Adjust Insurance Coverage

This is a good suggestion at any time of the year providing the insurance coverage has not been increased in the past several years Due to the increase in replacement costs, some structures may not be properly insured if they are based upon purchase price or upon construction costs of a decade or more ago. Farmers are urged to consult with their insurance agents in order to have proper protection.

Changes Noted In Family Picture In Recent Years

Looking at what's happened to families in the U.S. during the past 25 years shows some startling changes.

Helen E. Bell, extension home management specialist of The Pennsylvania State University, points out that 25 years ago there were 35 million households in the United States and seven million of these were on farms. Now there are about 59 million households and only three million are on farms.

Family size is down from 3.7 members per family 25 years ago to 3.3 members today, according to U.S. Department of Agriculture statistics. Part of this change is because more elderly couples are maintaining their own homes today and part because people are marrying and establishing homes at an earlier age than they did 25 years ago.

The "marrying" age for men today levels off at about 22 compared with 24 just a quarter of a century ago, according to USDA figures. Women are marrying about a year earlier, with the median age around 20.

Nine percent of the men and women 25 years ago never married. Today, only seven percent manage to stay single up through age 75.

The U.S. family has shown great strides in education. Miss Bell says that 25 years ago we could only claim eight years of schooling as our median educational level. Now the level is 12 years or the high school graduate level. And 10 percent of our national population over 25 years old has graduated from college compared with 5 percent a quarter of a century ago.

Alfalfa Plants

Alfalfa growers who would like to do something this fall to increase yields next summer might consider the top-dressing of their established stands this fall with a phosphorus-potash fertilizer; both of these soil elements are used liberally by the alfalfa plant and need to be supplied annually; the time of the application is usually following the removal of the last crop of alfalfa. The use of nitrogen in the fertilizer on healthy stands continues to be questionable

Of all inventions, the alphabet and the printing press alone excepted, those inventions which bridge distances have done most for civilization.—Macaulay.

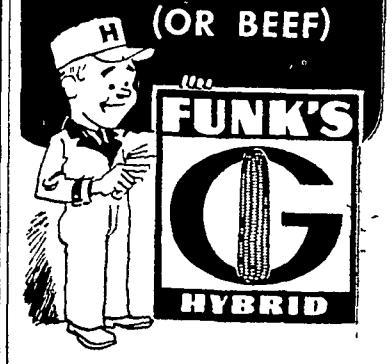
For Silage That Makes MORE MILK (OR BEEF)



Lancaster County Livestock farmers are pushing their corn silage yields upward with Funk's-G. Here's why:

- Excellent ear-to-total-green-weight ratio for highest quality.
- Leafy, dark green fodder for maximum tonnage.
- Heavy grain-yield potential for highest TDN.
- Bred for high populations, narrow rows, high fertilization.
- Big ears, deep kernels for more feed value in the "ear zone".
- Top palatability.

County Red Rose Chapter Holds Meet

by Robert Wanner

The fourth County FFA meeting was brought to order by President Linford Martin recently at Penn Manor High School Committee reports were given by Lampeter-Strasburg on the Lampeter Community Fair, Solanco on the Lancaster County FFA Picnic and the Softball Tournament, and Elizabethtown on the County Star Farmer Contest

There was no old business to be transacted

Items under new business included Dairy Calf Applications and Interview, Leadership Training Conference, County FFA Dues, Keystone Farmer Degree Applications, and the Red Rose Degree Applications

After the meeting was adjourned, refreshments were served in the shop area

Don't Remove Green Leaves

Green leaves indicate a healthy garden, say extension vegetable specialists at The Pennsylvania State University. It is best to allow the leaves on tomato, squash, and watermelon plants Trimming the leaves from such plants does not cause added growth in the fruit

Local Man Is Named President Of State Hampshire Sheep Assn.

The annual Pennsylvania Hampshire Sheep Field Day was held recently at the Pennsylvania State University sheep and cattle barns. The program consisted of inspection of the University Hampshire flock including the show flock. Also the sheep evaluation center and a tour of the new sheep barns.

After lunch Dr. Tom Merrit, of the University, gave a talk and demonstration of type conformation of Hampshire sheep. A business meeting followed and election of officers and directors are as follows: Clyde Brubaker, 2418 Harrisburg Pike, Lancaster, president; Mrs. Clyde Brubaker, secretary-treasurer; and Harold Harpster, Boalsburg, vice president Other directors include Henry Showalter, Akron; Stewart Ebersole, York; John Mardin, Russell; Ben Morgan, State College; Robert Harbster, Oley; George Van Wagner, Dauphin.

Next to doing a good job yourself, the greatest joy is in having someone else do a first-class job under your direction.

Manor Young Farmers Set Safety Meeting

Discussion of Farm Safety, emphasizing corn picker accidents, will be the topic of the Tuesday, Oct. 8 meeting of the Manor Young Farmers to be held at Nissley Farm Service, Washington Boro at 8 p.m

Several local farmers who have been involved in corn picker accidents will be on a panel to relate their experiences. A film, entitled "Hands Off", will be shown on corn picker accidents.

Prior to the 8 p.m. meeting, a corn yield check demonstration will be conducted on corn that was planted with a no-til planter.

Manheim Fair Schedule

Wednesday, Oct. 9
3.30 p.m —Swine and Sheep judging.
6.30 p m.—Beef Show.
7:00 p.m —Parade.

Thursday, Oct. 10
6:30 p m —Dairy cattle judging.

Friday, Oct. 11
2 00 p m.—Tractor Driving Contest.

MILLER

SMALL GRAIN SUPREME 5-11-14

with Rheolite ®

A quality fertilizer designed to help the grower achieve higher grain yields and make more profit. Miller's Small Grain Supreme offers the following extras:

1. Stronger straw to help prevent lodging.
2. More uniform crop with fuller kernels.
3. Crop will ripen more evenly.
4. Crop is in better condition for overwintering -- less plants lost.
5. More nutrient value in the harvested crop.
6 Is a mineralized granular product.
7. Contains RHEOLITE ® — Miller's organic fertilizer lubricant which insures free flowing qualities.

Top Carcass In Fall Show Goes To Willow Glen

The top carcass in the Lancaster County Swine Producers Fall Carcass Show held at the West Lampeter Community Fair last week was produced by Willow Glen Farm, Strasburg. The Yorkshire had a ham loin percentage of 43.0; back fat, 1.1 inches; carcass length, 32 2 inches; and loin eye area of 5 5 inches

Carcasses were processed at Kunzler and Co , Inc , with John Zeigler, of the Penn State meats department, as judge.

Other placings, with breed and ham loin percentages, were:

Second, Dutch Valley Farm, Yorkshire, 42 5; third, Spring Run Farm, Yorkshire, 41 5; fourth, John Strawbridge, Hampshire, 41 4, fifth, Carl Harrison, Yorkshire, 39 6, sixth, George Cogley, Yorkshire, 39 2;

Seventh, Elwood Houser, Yorkshire, 38 2, eighth, Abram Zeiset, Yorkshire, 39 5; ninth, Earl Livengood, Yorkshire, 37 5; tenth, Real Farms, crossbred 43 8, 11th, Leon Arnold, Yorkshire, 39 2, 12, Masonic Homes Farm, Duroc, 44 4; 13th, J Arthur Rohrer and Sons, crossbred, 38 3.

Placings in an evaluation contest, based on how close participants came to actual figures, were Ronald Harrison, Tipton, first; Mark Nestleroth, Manheim, second; John Henkel, Strasburg, third; Leon Arnold, Lebanon, fourth, Joe Little, Strasburg, fifth, Elwood Houser, Lebanon, sixth; Carol Henkel, seventh, James Horton, Elizabethtown, eighth, Larry Arnold, Lebanon, ninth, Abram Zeiset East Earl, 10th, Sara Zeiset, 11th; Melvin Huber, Lititz, 12th, and Eric Zeiset, 13th.

County Boys To Be Honored With The American Farmer Degree

The "American Farmer" degree will be awarded to ten Pennsylvania members of the Future Farmers of America at the 41st annual FFA National Convention in Kansas City, October 14-19

"American Farmer" is FFA's highest and only national degree, a coveted honor which cannot be awarded to more than one tenth of one per cent of FFA's membership. It is won for exceptional farming achievement and rural leadership within three years after graduation from high school.

Henry Givler, vocational agriculture supervisor for Lancaster and York counties, reported the two Lancaster county boys to be honored are Glenn S Weber, Mohnton R2 and James R Esbenshade, Quarryville R2.

Presentation of the degree occurs in Kansas City's Municipal Auditorium at the Wednesday afternoon (Oct 16) session of the convention Each of the new American Farmers will receive a certificate and gold key, if present in person, he also receives $125 in cash from the FFA Foundation, Inc Although investiture with the degree follows a vote by FFA convention delegates to bestow the honor, the Pennsylvania candidates already have won approval by the national FFA board of student officers and board of directors and such approval usually is tantamount to election by the delegates.

Eligibility for the American Farmer degree is determined by proof of the Future Farmer's outstanding success in becoming established in farming, including records of his farm business during and after high school. The degree is limited to FFA boys who have been out of high school at least one year, are showing strong evidence of leadership in rural and community life, and have productively invested at least $1,000 earned through their farming programs

State Associations of FFA are limited to one American Farmer nominee for each 1,000 members

Saturday, Oct. 12

7 30 p m —4-H Night at Elizabethtown High School.

WINNER of the FFA Area Tractor Driving Contest held last Saturday in conjunction with the Ephrata Community Fair is Jay Smoker, Stevens R1. Jay is the son of Mr. and Mrs. Earl Smoker.

● Smoker Wins

(Continued from Page 1)

Winners were:

1. Jay Smoker, Cloister FFA Chapter, Ephrata, son of Mr. & Mrs. Earl Smoker, Stevens R1, 356 points.

2. Nelson Weaver, Grassland FFA Chapter, New Holland, 344 points.

3. Glenn Kreider, Solanco FFA Chapter, Quarryville, 334 points.

4 Paul Fry, Red Lion FFA Chapter, Red Lion.

5 Robert Smeal, Elizabethtown FFA Chapter, Elizabethtown

The Ephrata Farmers Day Association provided the trophy, plaques, ribbons and premimum money.

The first place winner received a trophy and the 2nd and 3rd place winners received plaques.

All placings received ribbons. The first three placings in each event received premium money and ribbons They were:

Event # 1–Paul Fry.

Event # 2–Daniel McElwain, Kennerdell FFA Chapter.

Event # 3–Nelson Weaver, Glenn Kreider, Daniel McElwain

Event # 4–Robert Smeal.

Event # 5–Glenn Kreider.

Area farm machinery dealers assisted in the contest and provided new tractors for the event They were International Harvester Sales & Services, Farmersville Equipment Co, Roy H. Buch, Allen H Matz, Inc., A B C. Gioff, Inc, and Shotzberger Equipment Co Also assisting in the contest were the ag teachers from Lancaster and York counties Co-chairmen of the contest were Don Robinson, Ag teacher at Garden Spot High School, New Holland, and Charles Ackley, Ag teacher at Ephrata High School

● NEPPCO

(Continued from Page 1)

October 9, will be given over to special commodity sessions on eggs, broilers and turkeys Each will get underway at 1 30, terminating at 3 30 Egg industrymen will meet in the Mid-Atlantic Room; broilermen in the Delmarva Room; and turkey industrymen in the New England Room Speakers have been carefully picked to deal with key developments in each of the three industries.

On Thursday, Oct 10, the educational program will begin at 10-30 a.m in the Mid-Atlantic Room. It is broad-gauge in nature—directed primarily at the trends that are shaping the future of the poultry industry

Leading off will be Dr. William R. Henry, agricultural economist of North Carolina State University, who will talk about "The Handwriting on the Wall" He is expected to deal primarily with the problems of the "boom-and-bust" economy that has plagued the industry . . explain what might be done to avoid another year like 1967

Winding up the program will be Lane Palmer, editor of Farm Journal magazine, who will describe for his audience some of the trends that are currently shaping the future of the industry, and of all agriculture

Last year more than 3000 poultrymen from the 14 states in the NEPPCO area—and from well beyond it — attended the exposition and convention It also attracted substantial representations from overseas and Canada.

According to the National Association of Manufacturers, "Reaction to staggering budget deficits and accelerating inflation has clearly indicated that people are beginning to question and resist uncontrolled growth of the public sector. It's time for the people to speak up and demand economy in government."

County-Wide Winners Named In Judging

County-wide winners in the judging contests held last week at Lampeter Fair were announced at the Vocational Agricultural Teachers meeting held late Thursday afternoon at Elizabethtown High School.

They are as follows: **Chapter Average,** 1, Ephrata 527.57; 2, Warwick 508.12; 3, Manheim 502.67; 4, New Holland 491.0; 5, Solanco 480.85; 6, Elizabethtown 480.07; 7, Lampeter 476.16; 8, Pequea Valley 475.10; 9, Penn Manor 477.0.

Individual Score: 1, Perry Ansel, Church St., Reamstown, Ephrata, 656 9; 2, Linford Martin, East Earl R1, New Holland, 653.2; 3, Glenn Leininger, Denver R2, Ephrata, 646 2; 4, Jeff Pfautz, Stevens R1, Ephrata, 625 5; 5, Dennis Hess, Lititz R1, Warwick, 616; 6, Darrell Good, East Main St., Terre Hill, New Holland, 615.4; 7, John Merkey, Stevens R1, Ephrata, 613.5; 8, Abe Fisher, Lancaster R2, Penn Manor, 613; 9, James Weaver, Academy Drive, Ephrata, 610; 10, Daniel Brandt, Manheim R4, Manheim, 609.6.

Livestock: 1, Vernon Yost, New Holland R2, Pequea Valley, 438; 2, David Harting, Denver R2, Ephrata, 424.6; 3, Perry Ansel, Church Street, Reamstown, Ephrata 424.2; 4, John Horning, Lititz R1, Warwick, 422 1; 5, Jay Hastings, Kirkwood R1, Solanco, 416.2, 6, Glenn Leininger, Denver R2, Ephrata, 414 9; 7, Wendel Ranck, Paradise R1, Pequea Valley, 412.4; 8, Dan Cooper, Holtwood R1, Penn Manor, 404.-7, 9, Raymond Bollinger, Ridge Ave., Ephrata, 404 5; 10, Linford Martin, East Earl R1, New Holland, 404 5.

Dairy: The high score in dairy judging this year went to an adult, J. Robert Hess, Strasburg R1 with 294.6 points. He will receive the $25 savings bond given by the breed associations each year. In the FFA contest, the placings were: 1, Jay Zimmerman, Ephrata R1, Ephrata, 280; 2, Jeff Pfautz, Stevens R1, Ephrata, 277.6; 3, Abe Fisher, Lancaster R2, Penn Manor, 275.5; 4, Dennis Styer, Lititz R4, Warwick, 259.5; 5, Dale Bollinger, Quarryville R1, Solanco, 258.1; 6, Larry Horst, Leola R1, New Holland, 257.2; 7, Eugene Rutledge, Peach Bottom, Solanco, 253.4; 8. Sam Troupe, East Earl R1, New Holland, 252 9; 9, Dennis Hess, Lititz R1, Warwick, 252.4; 10, Dennis Rohrer, Manheim R4. Manheim, 248 8

Barley Crop

The lodging of the 1968 winter barley crop was quite severe on many local farms; this reduced the yield and the quality of the crop. This problem is hard to correct because moisture conditions have a very important part in the rankness of the barley growth. However, in many cases the lodging was severe because of the presence of too much fertility, especially too much nitrogen. Growers of winter barley are urged to use only a phosphorus-potash fertilizer this fall and not to apply any manure on the barley crop. On most fields the fertility is adequate to give ample straw length without any extra nitrogen

GET THE BIG WIDE MONEY SAVER:

Solid Kaiser Aluminum Diamond-Rib® roofing and siding.

Diamond-Rib roofing saves you money when compared with other roofing materials. It gives you...
- more coverage per square purchased
- labor savings because you handle fewer sheets
- comfortable, more productive livestock
- fewer laps, tighter roof
- buildings up to 15° cooler in summer — warmer in winter
- solid rustfree metal that can't lose a protective coating—it protects without painting
- the only roofing sheet with two big guarantees!

HAIL GUARANTEE
Kaiser Aluminum Diamond-Rib roofing and siding is guaranteed for 15 years not to leak as a result of perforation by hail. No other damage is covered under this guarantee. Limited to replacement of material only. Not prorated. Not transferable.

CORROSION GUARANTEE
Kaiser Aluminum roofing and siding is guaranteed not to leak from perforations caused by corrosion, provided Kaiser Aluminum accessories are used in installation, and roofing and siding are not in contact with dissimilar metals or ground. No other damage covered Diamond Rib guaranteed 30 years. Limited to replacement of roofing and siding only. Prorated after 10 years based on prices at time of adjustment. Guarantee application must be approved Not transferable Limited to farm or residence installations.

Helping the World Grow Better

ORTHO

Advantages of Fall Plowing Down of ORTHO FERTILIZERS

1. Gives opportunity for part of spring work to be done when time is less critical.
2. Allows winter freezing and thawing to mellow heavy soils and provide better seed bed.
3. Causes fields to dry and warm up earlier — permits earlier planting.
4. Avoids soil compaction from working fields when too wet.
5. Escapes planting delays caused by wet springs.
6. Reduces run off and increases stored moisture.
7. Increases yields of many crops.

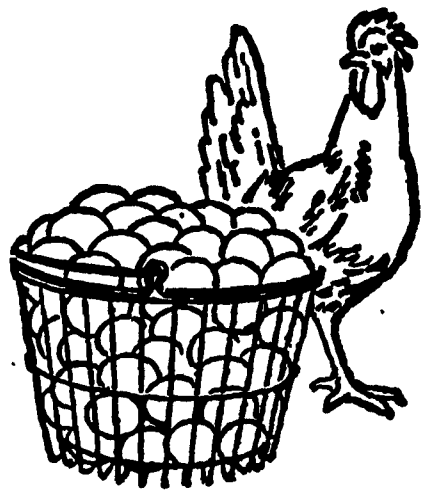
EGG PRODUCERS



In August we mentioned an unusually good flock record which shows what you can get out of Early Bird Optimum Performance Feeds if Management and Birds are close to perfect.

Here Is The Final Record On This Flock

PRODUCER —
H & M Flock 601 A — John Deimler, manager

DATE HOUSED —
July 6, 1967 Age - 21 wks Number - 6870

SYSTEM —
Slats and dusting area

PULLETS —
Spring Raised in conventional housing

DATE SOLD —

Sept 3 68	3030
Sept. 5 68	3288
Number Sold	6318

Days in production
426 and 428 days

% Liveability
91.96%

Eggs produced per hen housed
313.6

Feed Conversion per dozen produced
3.58 lbs.

EGG ANALYSIS

Grade A		Grade B	
Jumbo	1.28%		6 31%
Large	54 78%	Grade C	3.73%
Medium	25.77%	Dirties	0 14%
Pullet	6.39%		
Pee Wee	0.50%	Bloods	1.10%
	88.72%		11 28%

There is a difference when you combine

- Top Quality Pullets
- Top Quality Feed

and

- Top Quality Management

Our congratulations to John Deimler, farm manager for a fine record.

Try the Early Bird Optimum Performance line together with your best management and M & B's Service.

YOU'LL BE MORE THAN PLEASED WITH THE RESULTS.

EXTRA POWER. Reuben Weaver Jr., Ephrata R1, rigged an auxiliary motor on his harvester to get big tractor power up to 73 horse power on the P.T.O. using his small 48 horse power tractor. Running the motors together enables Weaver to harvest corn at four miles per hour. At left, another unit runs the blower to fill the silo. The extra units have been in use for three years and they perform satisfactorily.

234 CORN HARVESTER

A really new kind of corn harvester, the Model 234 has all the corn-saving features of a combine cornhead, plus the versatility of quick-change rear units for shelled corn, husked or snapped ears.

No other picker has a self-contained power-mounted universal frame—it fits 4 competitive makes of tractors, 11 different models. And the exclusive snapping unit has scalloped rolls and stripper plates similar to those used on IH corn heads . . . also available with conventional deep-pocket snapping rolls, interchangeable with scalloped rolls.

The 234 mounts and dismounts in less than 10 minutes, so your tractor is available for other chores. Save corn, save time, save money, with the 234 Corn Harvester. Stop in today.

FOR THE FARM WIFE AND FAMILY

by Mrs. Richard C. Spence

—IT DOESN'T PAY TO PINCH? Buying fresh fruit is a touchy subject. People touch, pinch and rub fresh fruit trying to squeeze out the best ones. Rough handling causes fruit spoilage and waste The grocer has no choice but to pass this loss to the consumer, so costs go up.

Take advantage of seasonal buys in blueberries, grapes, melons, nectarines, peaches and plums when they are in season Quality is higher and prices more reasonable

Blueberries that are plump, firm, uniform in size and free from stems or leaves are the best buy A dark blue color with a silvery bloom is a good indication of quality This silvery bloom is a natural protective coating

White or green grapes are sweetest when the color is yellowish or straw color with an amber tinge Red varieties are better when a rich, red color is predominant over most of the berries No matter what variety you choose, pick plump grapes that are firmly attached to the stem Bunches are more likely to hold together if stems are green and pliable.

In order to select melons, you must know the signs of maturity and ripeness. A mature fruit is ready to be picked; a fruit will ripen properly if it's picked when mature; otherwise it won't ripen at all.

A thick and coarse netting or veining on a cantaloupe means that it's mature. If all or part of the stem base remains or the stem scar is jagged, the melon's probably not mature.

A ripe cantaloupe will have a yellowish cast, pleasant odor and will yield slightly to (light) thumb pressure on the blossom end of the melon. Most supermarket cantaloupes are quite firm when freshly displayed Hold them at room temperature until completely ripe

Choose honey dew melons with a soft, velvety feel A ripe honey dew is slightly soft at the blossom end, has a faint fruit amoma and a yellowish white to creamy rind color

There are so many varieties of peaches it's easier to list what not to look for Very firm or hard peaches with distinctly green ground color won't ripen properly. Also avoid very soft fruits, which are overripe. Don't buy peaches with large flattened bruises or with signs of decay.

Plum varieties differ widely in appearance and flavor, so you should buy and taste just a few to see if that variety appeals to you. Avoid fruits with skin breaks, punctures, or brownish discoloration.

The characteristics of both a peach and plum are combined in a nectarine. Look for rich color, plumpness and a slight softening along the "seam."

It seldom pays to buy perishable fruit just because the price is low. Unless the lower price is a result of overabundance, the so-called bargain may be unusable. Remember fruits are perishable — buy only what you can use.

* * * *

—STORING FOOD PROPERLY ELIMINATES WASTE? Proper storage is as important as buying food and cooking it well. Wasted food affects both your health and your purse. You probably waste a great deal of food each year as a result of spoilage.

Foods are perishable and many require refrigeration. Proper refrigeration saves food values and there is a right place for every type of food.

Meat takes the largest share of the food dollar. Therefore, you will want to give it special attention Remove the store wrapping from meat or poultry as soon as possible after bringing it home and cover it loosely with plastic wrap or waxed paper Many refrigerators have a special meat compartment, or store it near the freezing unit

Empty ground meat from the paper tray to a refrigerator dish and chill quickly Plan to use ground meat within two days or freeze it for later use.

Cooked meat, meat stock, or left-over meat should be chilled rapidly. Don't cut, slice or grind leftover meat until you're ready to use it.

Dairy products and eggs require immediate refrigeration. Cover milk and butter tightly and keep it away from foods with strong odors and flavors. Cheese needs to be tightly wrapped and soft cheese should be used within one or two days. Eggs hold quality longer if kept in a covered container and stored with the large end up. Never wash eggs until you're ready to use them. These food items may lose some nutritive value and provide a growing place for bacteria if left out of the refrigerator for long.

Fresh greens and vegetables should be trimmed before storing. If you don't have a vegetable crisper, place them in a covered pan, plastic vegetable bag or other covered container and place them on the lower shelves of the refrigerator.

Before they are stored in the refrigerator, fruits such as bananas, melons, pears and pineapple need to ripen at room temperature. Fruits with thick protective coverings like oranges and grapefruits don't need

Farm Women

SOCIETY #28

Society of Farm Women #28 met Tuesday evening, Sept. 24, at the home of Mrs. Nelson Kreider, R.D. 1, Ronks.

Mrs. Roy Book conducted the meeting. She reminded members of the County Convention on Nov. 2 at the Farm & Home Center and also of the Christmas Homemakers' Program on Nov. 13 and 14.

Mrs. William Dean led in devotions.

Mrs. Gordon Mellinger had a very interesting pine cone demonstration.

The hostesses for the evening were Mrs. Nelson Kreider and Mrs. Melvin Zimmerman.

A bake sale was held Sat., Sept. 21 at the Strasburg Market Place.

The next meeting will be a Halloween Party at the home of Mrs. Jake Bare, R.D. 1, Bird-in-Hand on October 24 at 7:30 p.m.

SOCIETY #27

Society of Farm Women #27 met recently at the home of Mrs. Arthur Wenger, Manheim R2. Mrs. Witmer Sherer assisted her as hostess for a "Come As You Are Party". Prizes were given to the best dressed, Mrs. James Garber; cutest dressed, Mrs. Russel Swarr; most scanty dressed, Mrs. Luke Brubaker.

Members voted to give $25 00 to the Mental Health Association.

Election of officers was held with the following results: president, Mrs. Arthur Wenger; vice president, Mrs. James Garber; recording secretary, Mrs. Sam Heineman; corresponding secretary, Mrs. Christ Miller; treasurer, Mrs. Gary Thompson.

The next meeting will be held Oct. 22 in Wayne Miller's barn, Mt. Joy-R1. The program will be a Hobo Party for husbands and wives. Each member shall bring something baked

There will be an Auction. Hostesses are Mrs. Wayne Miller, Mrs. Galen Benner, Mrs. Daniel Stoltzfus.

For The Farm Wife

(Continued from Page 14)

covering. Don't wash berries and cherries before storing. Spread them on a shallow plate and refrigerate. Wash and hull only when ready to serve.

It's best to keep home-canned and other foods packed in glass away from the light. Breakfast cereals which are used rapidly may be left in original containers. Flour and other cereal products which are kept for longer periods of time are best stored in tightly covered cannisters or containers.

* * * *

—TWO CAN EQUAL ONE? In reality this applies to 2 egg yolks substituting for one whole egg in recipes you frequently use, such as those for scrambled eggs, custard, pancakes, breads, simple cookies and cakes.

Use raw egg yolks in: baked custard, cakes, cookies, quick breads, homemade noodles, mock Hollandaise sauce, scrambled eggs, meat loaf and meat balls.

Use raw egg whites in: Cakes, cookies, breads, meringue, souffles, omelets (extra whites), fluffy sauces and pudding.

Use hard-cooked eggs or yolks in: Casseroles, egg sauce, garnish, salads, sandwich spreads.

* * * * *

—HERBS COMPLEMENT MANY FOOD DISHES? Generally one-fourth teaspoon — a pinch — of dried herbs for each four servings is about right.

Be selective in adding herbs to a particular food. Unless you are following a tested recipe, one herb will probably be enough to spark up a dish with distinctive flavor.

Add herbs to cooked foods such as stews, soups and sauces during the last hour of cooking. Uncooked foods such as salad dressings, fruits and juices may need more time for flavors to blend. Add herbs as long as possible before serving to these dishes.

Herbs make nice houseplants in any sunny window. A few plants of several kinds of herbs will serve the needs of the average family. Next spring they can be planted outdoors.

When harvesting sweet basil, marjoram, rosemary, saffron, thyme, sage, or summer savory cut when starting to flower. Hang the plants for drying in a warm, dry dark room. Brush flowering tops and pack in closed containers.

Harvest anise, lavender, caraway, chervil and coriander on a dry summer day after seeds develop. Place seed heads on frames of stretched cheesecloth or netting for air circulation. Place in cool shed or room. When dry, remove seeds from stems and seal in bottles.

Prevent Forest Fires

Already fires have burned more acreage on National Forest protected land during the first six months of 1968 than during the same period last year. People using forests during September should be careful with their campfires, matches, and cigarettes. Smoky Bear is right — only you can prevent forest fires

Ladies, Have You Heard? . . .

By Doris Thomas, Extension Home Economist

Canned Peas Offer Choice Of Flavors

Two types of peas are used for canning — the smooth-skinned early or early June type, and the dimple-skinned or sweet type.

US Grade A or Fancy peas are very tender and flavorful and their color is the typical uniform soft green of canned peas. They make good side dishes or salad ingredients.

US Grade B or Extra Standard canned peas are not so tender as Grade A peas but they have a good flavor. They are good as a side dish or in casseroles.

US Grade C or Standard canned peas are more mature but have a fairly good flavor. They don't look so good as the higher grades but they're just as nutritious. They are a thrifty buy for a side dish or for use in soups, purees, or souffles.

Check Appliance Service Costs

THOMAS

Before you buy major home equipment, ask the dealer about servicing

Determine what service you can expect.

Investigate the provisions of the warranty and what you need to do to register the appliance with the manufacturer.

You'll need prompt local service from trained servicemen to help make the guarantee or warranty effective.

Read and study the manufacturer's guarantee or warranty before you buy the equipment

Any piece of equipment that has moving parts may require some servicing in its lifetime

Equipment with automatic controls may need more servicing and more complex servicing than nonautomatic

Facts Worth Knowing About Honey

Honey is the nectar of flowers collected, modified, and stored by the honeybees in small waxen cells of the honeycomb. It takes about 20,000 bees to bring a pound of nectar into a hive A pound of nectar yields about one-fourth pound of honey.

Honey flavors are as varied as the flowers in the field. The flavor comes from the flowers Color also comes from the flowers. Honey colors range from water-white through golds and ambers to dark brown The darkest honey comes from the firewood that follows forest fires in the Northwest

By far, the most popular honeys are clover and clover blends Often honey may be a blend of

NH To Close Farmec Plant

Operations at the Farmec plant at Intercourse will be consolidated with New Holland facilities effective December 31, 1968 according to J. Paul Lyet, II, vice president and general manager of the New Holland Division of Sperry Rand Corporation.

In announcing the closing of the Farmec plant, Lyet said that manufacturing operations will be integrated into other company plants.

It is expected that most of the people of the Farmec plant will be employed at the facilities in New Holland

The New Holland Farmec Division occupies the former Smoker Farm Elevators, Inc. plant which New Holland acquired in October, 1958. The division manufactures silage and feeding equipment systems, conveying systems and liquid manure handling systems.

Freezer Operating Costs

It costs no more to operate a freezer full of food than it does an empty one. Yet U.S Department of Agriculture specialists found that only about half the families who own home freezers keep them even three-fourths full. About 40 percent of the space is filled with meat; about 35 percent with fruits and vegetables-

Career Production For Area Holsteins

Lifetime milk and butterfat production levels for Registered Holstein cows in this area have been announced by Holstein-Friesian Association of America. The individual animals have been credited with career food production totals exceeding 100,000 lbs. (49,000 quarts) of milk. The official testing program is sponsored by the Association and supervised by the state and local testing organizations.

Because of the high cost for herd replacements, cows that stay in the herd longer and achieve high lifetime production have proven to be more profitable. The Holstein Association has nearly 29,700 cows on file that have attained the 50-ton production milestone.

Local Holstein breeders and their long-time producers reported by the organization include:

Strickst Ivanhoe Cheerio (G-P), 102,332 lbs. of milk and 4,-594 lbs of butterfat in 2 228 days. She is owned by Hiram S. Aungst, Elizabethtown.

Henket Daisy Ivanhoe (GP), 100,300 lbs. of milk and 4 305 lbs. of butterfat in 2,381 days. She is owned by Henry E. Kettering, Lititz

Nancy Leader Knollwood (V-G), 111,799 lbs. of milk and 4,-931 lbs. of butterfat in 2,320 days; Inka Star Betty (VG), 110,750 lbs. of milk and 4,326 lbs. of butterfat in 2,350 days. Both are owned by Red Rose Research Center, John W. Eshelman & Sons, Lancaster.

Healthy Teenagers

A balanced diet is the key to keeping teenagers healthy, reminds Mrs. Ruthalee M. Carroll, Penn State extension foods and nutrition specialist. Teens need to choose foods wisely to provide needed nutrients within the range of calorie requirements and compatible with proper weight control.

* * * *

Riches may not bring happiness, but neither does poverty.

If men were truthful, women would be miserable.

"Buck" Benson To Be At Penn Manor HS

A special Country Music program featuring "Buck" Benson will be held at the Penn Manor High School on October 12, at 8:00 p.m. It is sponsored by the Kiwanis Club.

Tickets are $1.50 for adults and $.50 for children under 12, and may be purchased at the door, the Manor Plaza Restaurant or the Happy House in the Manor Shopping Center. Everyone is invited to attend.

● Have You Heard?

(Continued from Page 15)

several types. As a rule, the lighter the color of honey, the milder the flavor.

Refrigerate Bananas?

Allow bananas to remain in the open until they reach the desired degree of ripeness. Then refrigerate.

Refrigeration will retard the ripening and decaying process.

Banana skins may darken after they've been refrigerated for a while, but this doesn't affect the flavor or consistency of the fruit.

FEED CATTLE FASTER AND MORE EFFICIENTLY THAN EVER BEFORE!

As observed in the AMA NEWS, published by the American Medical Assn, the taxpayer's most common mistake in itemizing 1967 deductions was failure to include one-half of first $150 spent for medical and hospital insurance, says the Internal Revenue Service. The federal government was flooded with amended returns. Another common mistake was failure to include transportation expenses for medical care.

Dear Long and Bomberger:

Moss is growing on my roof! Will that cause rot and leakage? Do I need a new roof?

Signed:

Worried

Dear Worried:

Relax. Sounds like you have a cedar shingle roof as other kinds seldom last long enough for moss to grow. Cedar shingles won't rot, even with moss on them. Sawn cedar lasts up to 75 years with only minor repairs; hand split cedar lasts even longer. In fact, cedar shingles outlast asphalt roofing by about 3 to 1. Incidentally, we sell many kinds of quality roofing, including cedar and asphalt. If and when you ever do need a new roof, let us know.

Yours truly,

Medical Missionary Reports (Part III)

Hondurans Have Hope

by Garland Gingrich
Penn Manor Vo-Ag Instructor

Honduran's do have hope! They are human beings just like you and I. They do have families. They do live in houses. They do have their own personal desires, wants, needs and yes hopes.

After working with Hondurans, one of the emerging nations of the world, it is possible to see some programs that are helping. There are two that stick out in my mind that do offer examples of the kinds of hope that do exist. After talking with others and reading entensively, it can be logically assumed that the two hopes that stick out in my mind for Honduras do apply to other emerging countries as well. The two biggest hopes they have are: (1) their own interest and initiative and (2) the church.

Let's look at these two hopes of the future for Hondurans and citizens of other emerging nations. Hopes that are real and are a reality today — not at some distant. future date.

The best hope is their own personal initiative, their own personal desires to have a better way of life They do go to great efforts to learn new skills and abilities.

Here is an example of individual initiative agricultural missionaries find in Honduras. Hondurans realize they need to learn to raise vegetables to supplement and improve their too starchy diets They realize the first step in raising a good vegetabble garden is to learn how to improve the soil To teach Hondurans these basic and elemental steps of making a vegetable garden, workshops were conducted. They showed their interest and their enthusiasm by WALKING four and five days to attend these workshops. Most were illiterate so they brought their children who had a third grade education to take notes so nothing would be forgotten All this effort to learn the new and spectacular skill — the use of the shovel and hoe.

No! Hondurans are not lazy. Even though this is what many people would try to have us believe. In my book, anyone willing to walk 4 or 5 days to learn how to use a shovel and a hoe so he can better feed his starving children is not lazy

It is true that Hondurans do not work as many days per year as does the average resident of Lancaster County Some studies reveal that they work only about one half the days during the year. But than, if 98% of the people of Lancaster County had active TB and all of us had heavy infestations of worms and amoebas that constantly made us ill, drawing up to a glass of blood from our bodies daily I guess we would not be as active either.

The constant, vicious cycle of poor diets, disease and illiteracy make Hondurans appear lazy to those not caring to look at the root causes. Agricultural missionaries who are willing to look at these three root causes have learned that programs based on the needs of families in developing nations offered at the levels they can use do meet with success. Success that does break the starvation cycle.

A second reason Hondurans have hope for the future is the Church. Agricultural missionaries soon recognize that the Church is the major hope that the mass of Hondurans have for receiving help. The Church is the only institution we found working in Honduras with a program philosophy that (1) is interested in reaching the masses and (2) has a continuing, follow-up program. The Church as an institution has been there, is there, and is going to be there.

The Church is operating programs in education through its educational missionaies. In some areas the church school for years has been the only institution waging the battle against illiteracy.

The Church is helping combat disease through its medical missionaries.

The Church is also sponsoring programs to train people how to farm more efficiently through its agricultural missionaries.

These are all in addition to the traditional missionary work that has been and still is being conducted.

This is the new look in missions. Programs designed to meet the needs of a total man.

Through vegetable gardening workshops, through demonstration plots, through poultry management workshops, through the introduction and management of new dairy, goat, poultry and other classes of livestock the church with the cooperation of Heifer Project, Inc. is meeting the needs of the total man.

Agricultural missionaries are not necessarily career people. Some are ordinary farmers working short periods of time of up to two months per year. In fact, it is often the farmer with the practical knowledge of what to do rather than the college professor with programs that are beyond the reach of the people who is the most effective agricultural missionary.

A farmer who remembers encircling small vegetable garden plants with paper to prevent cutworms damage can demonstrate this to Hondurans and it is a skill they will learn and do. Frequently, people without the practical knowledge become

"The good land. You've reaped well that which you have sown".

NOW! REAP A 9% INVESTMENT-RETURN BACKED BY THE SAME "GOOD LAND"

Ask any farmer what he thinks about land-security. No one more than he has greater respect for the value and economic security of land.

On the whole, land never depreciates. Its value continues upward. No wonder those who work closest exhibit the most profound love and confidence for "the good land." Here is what we're leading up to . . .

A HIGH-GRADE INVESTMENT BACKED BY AMERICA'S GREATEST COMMODITY

We're offering an exclusive arrangement that will pay you a total of 9% on your investment. This investment is in land debenture. 9% is a remarkable return! Where can you better find so safe an investment with so great a return?

Place whatever amount you wish (maximum $20,000) in our investment plan and receive 6½% per annum. Allow the investment to mature and receive an additional 2½% return with an obvious built-in capital gains tax advantage.

Like the hard-working farmers who invest long hours of sweat and toil in their land, you too can benefit from this same kind of security.

Farmers have a natural instinct for something good. They are among our best customers. Act now, send in the coupon below or call us collect at area code 717 - 859-2200.

THIS IS A VERY ATTRACTIVE OFFER

HONDURANS

(Continued from Page 18)

frustrated, in suggesting controls such as chemicals that are just not available to his students because they are financially unable to buy them.

Lloyd Marsh, an Iowa corn and soybean farmer is the kind of person who has found personal satisfaction in helping others. Having no livestock, Lloyd does invest his winter vacations in helping people less fortunate than himself. He wrote and asked if he could help us in Honduras during the winter of 1967-68. The immediate reply was yes. During the two months Lloyd was in Honduras he maintained a model garden used for demonstration purposes. He also built model chicken and rabbit coops. While Lloyd was putting his own special skills to use doing these practical things, the agricultural missionary was free to do more face to face work with the national Hondurans.

There are other hopes that the Hondurans have, their own countries improved educational programs, increased agricultural research within the country and a rising Gross National Product. However, their own personal ambitions and the church by providing programs for meeting the needs of the total man are the two main hopes Hondurans have for a better way of life — the kind of life God surely meant for them to have when he created this earth for all to enjoy. — The End.

Correspondence Courses

GARDENER'S YEAR BEGINS IN AUTUMN

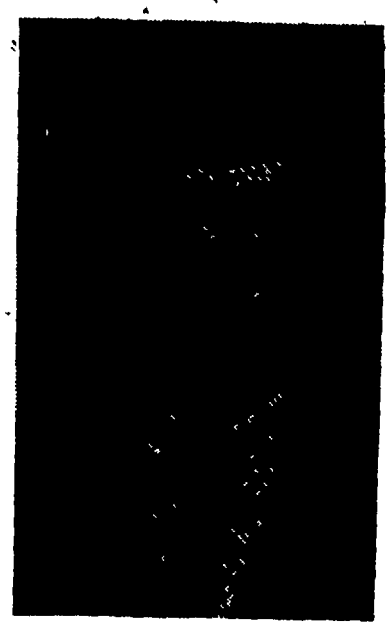
Autumn is the smart gardener's New York. He prepares for the next growing season by plowing, spading, or roto-tilling his soil, turning under crop debris and other organic materials.

Ground limestone is spread at the same time. According to a Pennsylvania State University correspondence course on soil fertility, about six months are needed for limestone to completely react with the soil. Mixed with the soil in autumn, calcium reaches its full neutralizing effect by planting time.

Phosphorus and potassium fertilizers are also applied in autumn. But withhold the soluble nitrogen until spring else it leaches away with winter's rains.

Do you want to learn more about soil fertility and management? Study the Penn State correspondence course. Anyone can enroll by sending his name and address with $2.50 to Soil Fertility, Box 5000, University Park, Pennsylvania 16802. Make checks to PENN STATE. A course copy comes to you by mail.

Two Lancaster 4-H Members Named State Award Winners



Dale E. Bushong

UNIVERSITY PARK — Dale E. Bushong, 17, of RD2, Columbia, and Marvin Nissley, 17, of RD1, Mt. Joy, were named state 4-H livestock conservation demonstration contest winners in the 4-H National Awards program.

The two Lancaster 4-H members presented the top livestock conservation demonstration at State 4-H Days last month at The Pennsylvania State University entitled "Internal Parasites."

Carroll L. Howes, assistant State 4-H leader at Penn State, who announced the award selection, said the youths will be eligible to attend National 4-H Congress in Chicago, December 1-5. They will have an opportunity to compete for honors at a national level. They were

Marvin Nissley

picked from among the 47,000 members who annually participate in the Extension Service youth education program

Dale, the son of Mr and Mrs. Robert H Bushong, has been a member of the Red Rose 4-H Baby Beef and Lamb Club the past eight years A 1968 graduate of Hempfield Union High School, he is assisting his father on their 150-acre farm.

Active in local 4-H activities, he participated in beef and tobacco club roundups, Rural Life Sunday, officers training, achievement day, and the Lancaster County 4-H Council He served as caretaker for 23 steers at the Eastern National Livestock Show at Timonium, Md., and was a 4-H exchange delegate to Kendall County, Ill.

Dale served his 4-H Club as president, treasurer, game leader, and song leader.

Marvin, the son of Mr. and Mrs. Wilmer Nissley, has been a member of the Red Rose 4-H Baby Beef and Lamb Club four years A senior at Donegal High School, he plans to become a farmer.

Also active in local 4-H activities, Marvin participated in three beef roundups, was a member of the planning committee for achievement night, and parliamentarian for the Lancaster County 4-H Council. He showed the reserve champion Angus steer at the Pennsylvania Farm Show

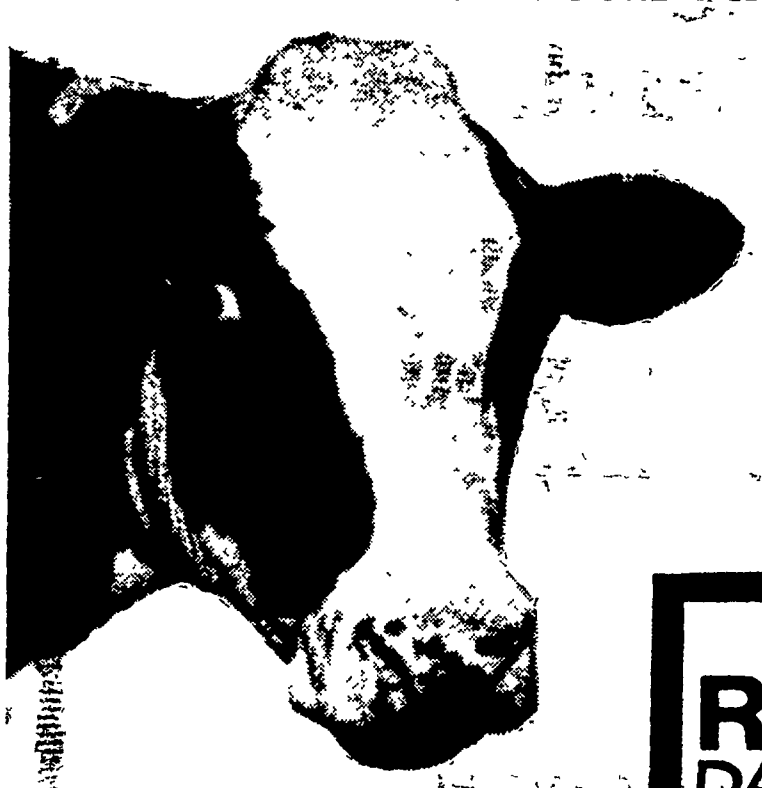
He served the beef and lamb club as treasurer, news reporter, and game leader.

The two county youths are among 43 Commonwealth 4-H members being selected as state contest winners in the various project categories.

"The 'poor people's march' on Washington cost the U.S. and the District of Columbia governments $1.7 million, according to Sen. Robert C. Byrd, of West Virginia," notes U.S. News & World Report "According to . . Byrd's report, the D C government bore $805,682 of the costs."

IF COWS COULD CHOOSE THEIR FEED...

THEY WOULD CHOOSE RED ROSE DAIRY FEED



RED ROSE DAIRY FEEDS are available in many protein levels — to fit your particular feeding program and roughages you have readily available on your farm. Use them in your barn! You will be sure that your cows will be eating just about the best feed you can give them!

Red Rose DAIRY FEEDS

"Best of Feed . . for any breed"

RED ROSE 14 TEST-COW FEED is a feed you'll find especially resultful. It's a course-textured, all-purpose feed — excellent for feeding to your milk cows, dry cows, calves and bulls — at all seasons.

Remember . . . it's in the milk pail where the results of good feeding really show. Red Rose Dairy Feeds will help to get the milk there. Decide to place them in your feed troughs.

These dealers carry a complete line of Red Rose Dairy Feeds and Dairy Supplements

Pa. Farm Price Level Steady

The September Index of Prices Received by Pennsylvania farmers was unchanged from a month earlier. Higher prices for eggs and milk were offset by lower grain, fruit and vegetable prices. The index was up 4 percent from a year earlier and 257 percent above the 1910-14 base.

Egg prices, advancing steadily since May rose to 45 cents per dozen, 8 cents higher than August and 10 cents above September last year. The sharp advance brought the price level to the highest point in almost two years. Milk prices advanced seasonally as supply declined.

Average prices of selected commodities are: Milk, (per cwt.) $6.05; Eggs, (per doz.) $.45; Broilers, (per lb.) $.16; Steers & Heifers, (per cwt.) $25.30; Hogs, (per cwt.) $20.30; Corn, (per bu.) $1.12; Wheat, (per bu.) $1.09; and Oats, (per bu.) $.65.

Clean arm-rests, head rests, and seat cushions more frequently than the rest of upholstered furniture, remind Purdue University extension home management specialists. These areas soil more readily.

Shearing Sheep With Chemicals No Nicks, No Cuts, No Shills

Nothing looks quite as naked as a chemically defleeced sheep, but this rarity may become common if preliminary tests pan out.

The chemicals being tested interrupt cell growth in the bulb of each wool fiber, causing a ringlike constriction. The constriction moves up from the bulb of each wool fiber as it grows and in 6 to 7 days, reaches a position just below the skin surface.

At that point, the fiber breaks easily, and the whole fleece can be separated at the skinline, leaving the sheep completely bare. An operator grabbing a handful of wool and rolling his wrist along the skin can defleece a sheep quickly and systematically without strain on himself, discomfort to the sheep, or wastage of wool.

Ease of removal in fact, is the main advantage of chemical defleecing. Shearing with clippers is a highly skilled task, calling for wages of about $12 per hour at Beltsville, Md., where the ARS trials are being conducted. By contrast, a non-specialist drawing about $2.50 per hour can quickly learn to remove fleeces from sheep treated chemically.

In addition, defleecing, unlike shearing, does not leave nicks and cuts on the skin. Although sheep seemed unaffected by the complete lack of fleece, precautions were taken to keep sheep out of extreme weather after defleecing. Wool has grown back normally on sheep defleeced since the trials began The most recent trial showed that defleecing can be delayed beyond the minimum of 6 to 7 days after chemical treatment so that a short growth of new wool forms below the constriction point of the wool fibers The fleece separates as easily as before but the new coat does away with the possibility of having to protect sheep from extreme weather after defleecing

Compounds tested for defleecing by ARS biologist E. H. Dolnick and co-workers are new drugs used in anticancer studies Medical scientists at the National Cancer Institute and Hazleton Laboratories, found that these drugs, aimed at stopping cell growth in tumors, also interrupted cell growth in hair roots. This caused test subjects including sheep, to lose their hair temporarily, a finding that renewed Dolnick's long-standing interest in putting chemical defleecing on a practical basis.

The process is not as unnatural as it sounds. American buffalo, for example, lose big clumps of long winter hair each spring; angora rabbits are conventionally dehaired by plucking without chemicals; and most sheepmen know individual cases of partial fleece loss in sheep after severe illness, parasitism, or grazing on shrubs containing chemicals which act like those being tested by Dolnick.

In these tests, a typical compound was given to sheep by mouth or injection in doses ranging from 2 milligrams (mg.) to 41 mg. per pound of body weight. The highest level was fatal; levels below 27 mg. caused no apparent harm, and even the lowest levels caused wool to loosen reasonably well. With the most effective dose about 14 mg., undesirable side effects have not been detected.

Further studies are necessary to determine whether chemical defleecing is economically practical and whether it causes chemical residues in the meat, alters wool growth or quality, or harms fleeceless sheep exposed to heat or cold. Drug choice, dosage, or time of treatment may need adjustment if such problems are uncovered. Still, Dolnick things defleecing may help relieve the labor shortage and price squeeze now plaguing the sheep industry.

METAL ROOFING by FABRAL

THE MOST COMPLETE METAL ROOFING LINE AVAILABLE ANYWHERE!

- Aluminum
- Galvanized Steel
- Factory Painted Aluminum
- Factory Painted Galvanized Steel
- Long Lengths - up to 40'
- Customer Lengths - You name the length

Now Fabral Metal Roofing is available in your area. For the first time you can specify the configuration, (choice of 7 available), and type of metal (aluminum, galvanized steel, factory painted aluminum, factory painted galvanized steel - even stainless steel). You can even specify the EXACT CUSTOM LENGTH (up to 40' long) tailored to YOUR job in most of these designs. In most cases, one piece of metal roofing will run from the peak of the roof down to the eave. No end laps to cause leakage - fewer sheets - less cutting and fitting on the job. The Fabral program saves on-site labor and gives you a neater, stronger and better building.

There are Fabral metal roofing sheets designed to fit your requirements for farm, industrial, commercial, utility and general purpose structures. Whether you are building a new structure or recovering an old one, you owe it to yourself to find out about Fabral Metal Roofing - the most complete line available - ANYWHERE!

Interest Shown In Pa. Farm Products At International Fair

Importers from Finland to South Africa displayed keen interest in Pennsylvania food products at IKOFA, the international food trade fair in Munich, Germany. The fair closed Sunday, Sept. 29.

Attracting most attention were chicken and turkey rolls, apple butter, grape juice, cigars, canned sour cherries and candy. Interest also was shown in apple juice, pie fillings, spiced apple rings, broiled-in-butter mushrooms, cream of rice cereal and other products.

Fifty-five thousand visitors — including importers, chain store operators, wholesalers and retailers — visited the American section of the fair during the first two days. Besides Pennsylvania, other states participating were Maryland, Iowa, Illinois and Minnesota. A number of commodity groups and a large number of private firms also had exhibits there.

Firms represented in the Pennsylvania area included Musselman and Company, Grocery Store Products Company, Hershey Foods, Inc., Keystone Grape Juice Cooperative, H. J. Heinz Co., Pennsylvania Dutch Company, Horace W. Longacre and Company, House of Windsor, Inc, Knouse Foods, Inc., and Quinlan Pretzel Co.

Heinz is personally represented by Oscar Roesemeier, export manager; Hershey is represented by Lars Thane, export sales manager, and Anthony Hammond, European representative.

Heading the Pennsylvania delegation was Jack R. Grey, Deputy Secretary of Agriculture, assisted by Donald O. Cunnion, chief of market development, Bureau of Markets, and market development specialists Thomas Imswiler and Merle Markley.

To gather in-depth information of the market potential for Pennsylvania products in West Germany and all of Europe, Grey and Cunnion met with Dr. Paul Minneman, U S. agricultural attache to West Germany; Alex Bernitz, assistant agricultural attache and marketing specialist for the USDA Foreign Agricultural Service; Dr. Alois Hundhammer, Bavarian Minister of Agriculture; Ron Jon Annaballi of Temple, Pa., special consultant to the USDA's Foreign Agricultural Service, and a number of leading importers and other marketing experts.

High productive efficiency, and not high wages, is the cause of high living standards.

WHY PAY MORE FOR LESS?

SILAGE ENRICHER

"ALGIT"

A PRODUCT OF THE SEA

Use 5 lbs. Algit to each ton of silage.

1. This prevents "Run Off". (of juices)
2. Keep the silage fresh.
3. Eliminate that certain odor from silage.
4. Increase the nutritional value of silage.
5. Cattle prefer Algit treated silage.
6. The smell which your clothes get in wintertime is eliminated.

Spread on top of load by hand before unloading.

Take As Good Care Of Your Heart As You Do Of Your Gun

Hunting season is here again, but with a little bit of forethought, it need not be open season on hunters.

Among the hazards of hunting is accidental death from a gunshot — one's own gun, or that of another hunter. Not so dramatic, but at least three times as prevalent, is the tragedy of heart attack deaths.

Unlike the deer, who can only try to outrun their stalkers, hunters can take certain precautions to avoid falling prey to the risks of the hunt. Here are some recommendations from (Your) Heart Association of Lancaster County to help bring hunters back alive.

First off, ask yourself this question: Do I have the heart to hunt? It's not sentiment or ethics we're concerned about here, but the condition of your heart.

Deer hunting often demands a level of energy output which may be triple or quadruple the level at which most part-time hunters operate during the rest of the year. Extremes of weather, change of altitude, rough terrain and the stress of the chase can levy a heavy tax on the heart's capacity.

In a unique series of experiment, the Minnesota Heart Association recently measured the heart stress on a deer hunter "who not only gets his deer but who drags it out of snowy woods single-handed" It was too much, they found, for 11 per cent of a pre-screened group of men over 40 who had no evidence of heart trouble The men who underwent the tests had previously been examined and found to have apparently normal hearts It's obvious, therefore, that the hazards to an unexamined cross-section of hunters over 40 would be higher.

Accordingly, the most important word from (Your) Heart Association of Lancaster County is

Have a complete physical examination before you plan your hunting trip Then your doctor can, if necessary, suggest ways in which you can pace yourself, get your deer and at the same time minimize the strains on your heart

Number one on his list would be **Don't drag the bag!** When you've downed your deer, let him lie until you can get a couple of able-bodied men to help move the carcass. And if you have a heart condition, let them do this job without you. Make your contribution to the hunting party in a less strenuous way.

Number two: If you have a heart condition, take at least one member of your party into your confidence. Tell him what medicine you take, how it is given and the symptoms which indicate the need for medication. He should know which pocket you keep it in, and the container should carry clearly typed instructions.

Number three: The heart may be a lonely hunter, but you shouldn't be. **Never hunt alone.**

Number four: Get a good rest — preferably a full night's sleep — before you set out to hunt.

Five: If you're hunting at a higher altitude, go a few days early. This will give your heart time to adjust to the lower oxygen content of the thin air before the stresses and strains of hunting are added.

Six: Rest as often and as long as you have to, before you get too tired; take your stand near camp and let the others flush.

And for all hunters, (Your) Heart Association of Lancaster County has this advice:

Condition yourself as for any unusual physical exertion, with an increasing schedule of exercise in preparation for the big event;

Choose lightweight but warm clothing, to lighten the load on your heart;

Know simple first-aid rules;

Be moderate in eating and drinking;

Observe the standard safety rules for handling firearms.

Remember: the biggest game is getting back in good shape. If you take as good care of yourself as you do of your gear, you can enjoy hunting for many seasons to come.

For a pamphlet concerning Safety Rules, How to Help in Case of a Heart Attack, write the Heart Association of Lancaster County, 246 W. Orange Street, Lancaster, Pennsylvania 17603.

Hunt happy and come home healthy.

It's the hard jobs that make us.

Harvest Report

Half the state's corn crop is mature enough to be safe from frost damage, the State Crop Reporting Service said today.

The apple harvest is in full swing in the southcentral region. Apples have colored well and are of good size. Concord grapes are coloring rapidly in Erie County and will be ready for harvesting in two weeks.

Most of Lancaster County's tobacco has been cut. The quality was good.

Facts are of slight value unless they are intelligently interpreted.

President – Quentin S. Snook, Snook's Mill, Mifflinburg, Pa.

1st Vice-President – George W. Robinson, Kreamer Feed Store, Kreamer, Pa.

2nd Vice-President – J. B. Pritts, Canonsburg Milling Co., Canonsburg, Pa.

3rd Vice-President – John J. Hess II, John J. Hess II, Paradise, Pa.

Treasurer – Robert B. Graybill, Miller & Bushong, Inc., Rohrerstown, Pa.

Director – W. H. Andrews, Jr., H. O. Andrews & Son, Mapleton Depot, Pa.

Director – Richard K. Crock, W. S. Crock & Sons, Nicholson, Pa.

Director – H. A. Glessman, L. A. Glessman, Inc., Conneautville, Pa.

Director – P. M. Spalding, York Flour Mills, Inc., York, Pa.

Director – Kenneth R. Weaver, Martinsburg Milling Co., Martinsburg, Pa.

Director – Robert Weindel, Agway, Inc., Harrisburg, Pa.

The three day event was opened by Paul J. Green, Farmer's Supply Company, Walkersville, Md., current President and featured a full educational program for the 300 delegates representing Pennsylvania's feed and flour industries.

The Public Service Company of Colorado recognizes that a solution to the problem of how to expand parking facilities has been discovered by a Georgia company which requires that all employees who own compact cars or "midgets" park in a specially designated area. These stalls can accommodate 43 of the smaller models in a space which will hold only 28 conventional size autos
